

AIRBUS A318/319/320/321 (CFM 56) to A319/A320/A321 (IAE V2500) Difference Course - Theoretical EASA Part-66 B1&B2

Course duration: 21 working hours (3,5 days)

School hours are from Monday to Friday with a daily schedule from 08:30 – 16:00 h.

In order to receive a Certificate of Recognition (COR), a minimum participation time of 90% of the training hours is required.

Description:

The training syllabus is intended for aircraft technicians and engineers who already have practical working experience on the aircraft and who fulfill other regulation conditions for the issue of AML Part-66 and/or A318/319/320/321 type rating.

Objectives:

On completion of this difference course, the student will acquire the additional knowledge and skills, that complement the related knowledge, skills learned and experience gained on A320 CFM 56 Family aircraft, so that they may safely maintain A320 Family aircraft equipped with IAE V2500 engines in a reliable and airworthy condition.

After completion of the course and passed examination the student will receive a Certificate of Recognition (COR).

Prerequisites:

- Completed A319/320/321 (CFM 56) Airframe, Power Plant & Avionics course.

Examination:

Theoretical examination is in written. The questions are multi-choice questions.

The examination Pass mark is 75%. Examination will be revised and the students informed of the result.
