

## **AIRBUS A318/319/320/321 (CFM 56) to A319/A320/A321 (IAE V2500) Difference Course - Practical EASA Part-66 B2**

### **Course duration:** 7 working hours

Daily schedule depends on the availability of aircraft.

In order to receive a Certificate of Recognition (COR), a minimum participation time of 90% of the training hours is required.

### **Description:**

The training syllabus is intended for aircraft technicians and engineers who already have practical working experience on the aircraft and who fulfill other regulation conditions for the issue of AML Part-66 and/or A318/319/320/321 type rating.

The training will be conducted on the aircraft and in the maintenance facilities

### **Objectives:**

On completion of this difference course, the student will acquire the additional knowledge and skills, that complement the related knowledge, skills learned and experience gained on A320 CFM 56 Family aircraft, so that they may safely maintain A320 Family aircraft equipped with IAE V2500 engines in a reliable and airworthy condition.

Practical training will be documented in the Practical Training Records (PTR).

After completion of the course and passed examination the student will receive a Certificate of Recognition (COR).

### **Prerequisites:**

- Completed A319/320/321 (CFM 56) Airframe, Power Plant & Avionics course & course & theoretical AIRBUS A318/A319/A320/A321 (CFM 56) to A319/A320/A321 (IAE V2500) Difference Course Part-66 B2.

### **Practical Assessment:**

Practical assessment will be conducted and assigned as "passed" or "not passed".
